Click on the second link to 'Robot control'. You are still in A Building at the early stage of assembly.

There are two computer monitors screens outside the robot cage facing south east.

1. What are these two screens and controls for? Check the text and the comment from the tour guide.

Move west one jump.

Facing south, checkout the evidence tag for a video extract.

Sometimes robots undertake complex tasks such as welding. In the later half of the video extract you will see a different type of machine simply turning the underbody upside down and then another picking it up and moving it.

2. Are these machines robots, like the welding robots ? What is your definition of a robot?
3. How many employees would it have taken to do the same job as these two machines?

Click the 'ge 1' (Gathering evidence 1) button to the left of the map in the bottom right hand corner and you will return to the Gathering evidence 1 list of employers.
