A VIEW of Healthcare Science

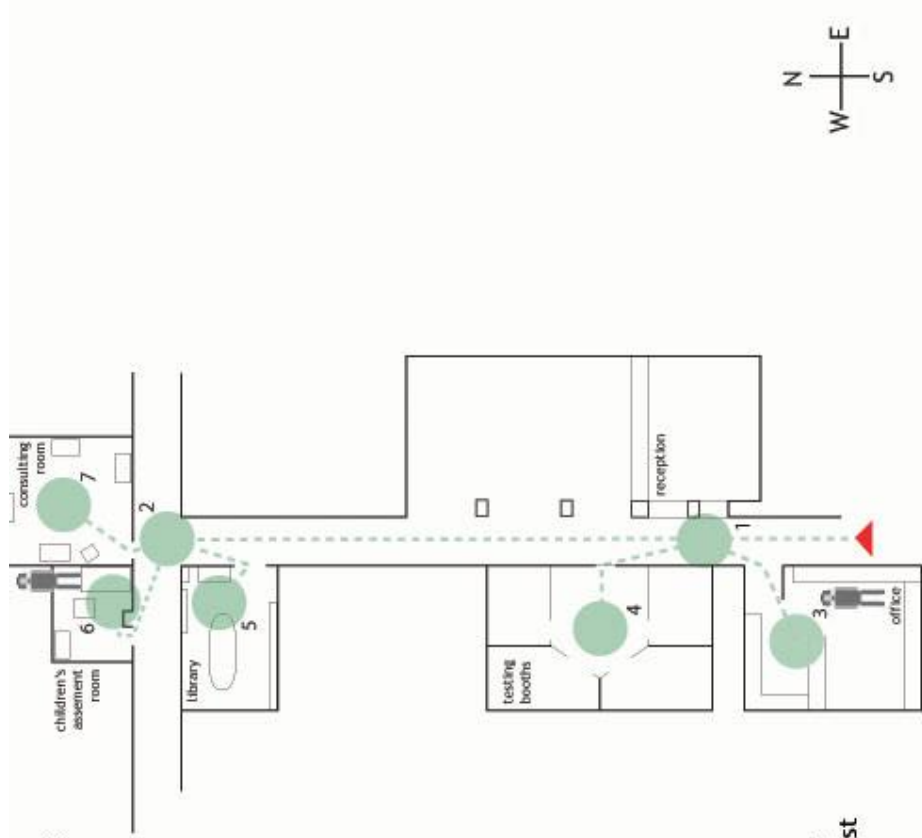

Map guides

**A resource developed with the support of:
SEEDA, (The South East England Development Agency)
and
Addenbrooke's Hospital, Cambridge.**

Many members of the public and young people in schools are unaware of the role and significance of the healthcare scientist in a hospital. VIEW Healthcare Science enables young people to explore 22 departments at Addenbrooke's Hospital where the healthcare scientist is at work. What they find could broaden the ambition of young people and perhaps inspire some to explore the career possibilities healthcare science offers them.

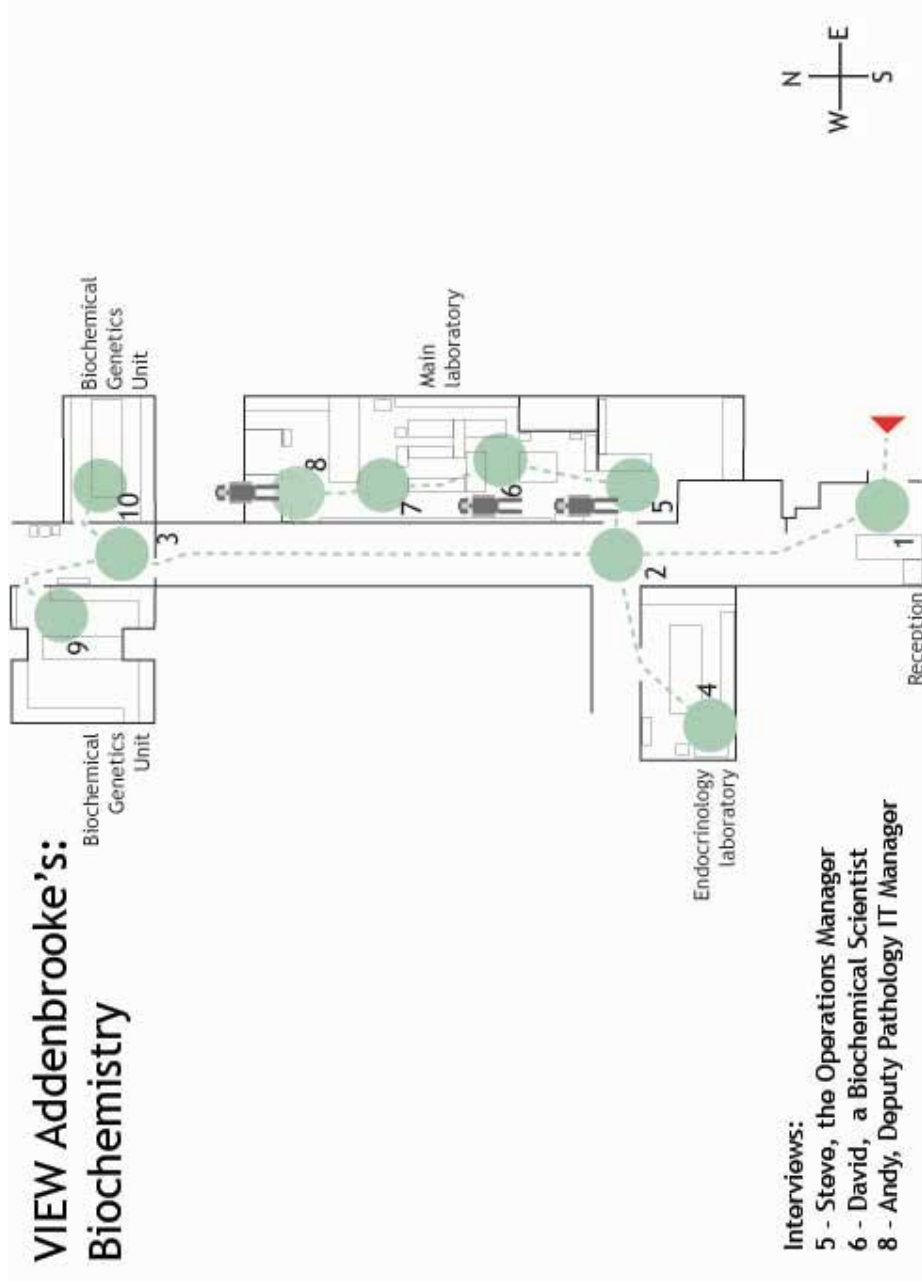

To be used in conjunction with VIEW Healthcare Science,
a CD based multimedia resource from FutureVu Ltd. 2006.
