

# A VIEW of Healthcare Science

## Speed quiz 2

**A resource developed with the support of:  
SEEDA, (The South East England Development Agency)  
and Addenbrooke's Hospital, Cambridge.**

This simple quiz encourages a student to visit another 10 departments.

In each case the student is directed to a point on the map using the map number.

A simple question acts to confirm that the student has visited the required area. The answer to the question is written in the box provided. The questions in this second quiz are more challenging than quiz 1.

The exercise challenges the student's ability to navigate around the departments and to be observant.

Students must use the rotary images, hotspots and maps to complete this task.

Students can repeatedly use the 'back' button to quickly return to the reception area.

Students could be challenged to complete the task as quickly as possible.

Can you find: **Medical Photography?**

Look around the work area (map point 2),  
What type of computers are in use?

Can you find: **Medical Physics?**

Look around the Linear Accelerator bunker (map point 7),  
What company manufactures the Linac in this room?

Can you find: **Microbiology?**

Look around the lab (map point 6),  
How many glove ports does the Anaerobic Cabinet have?

Can you find the: **Mortuary?**

Look around the post mortem area (map point 3),  
How many sinks are in this room?

Can you find: **Neurophysiology?**

Look around the examination room (map point 2),  
The sinks are used to wash hands and ?
